

## MENTAL HEALTH FIRST AID - CERTIFICATION

Generate a [group quote](#) today

**COURSE LENGTH: 2.0 DAYS**

The Mental Health First Aid (MHFA) course teaches participants how to provide initial support to someone who may be experiencing a mental health problem or mental health crisis, until professional help is received, or the crisis resolves. Course participants learn about the signs and symptoms of common mental health problems in adults, how to recognise and respond to an emerging or worsening mental health problem and the treatments and supports available.

Using a practical, evidence-based action plan, course participants learn how to approach someone they are concerned about and initiate a conversation about those concerns. Participants also learn how to offer initial support and information and how to encourage the person to seek professional help or other supports.

Adults who complete the course become Mental Health First Aiders, equipped with the knowledge, confidence, and skills to provide someone with mental health information and support when it matters most.

This course is recognised by Suicide Prevention Australia as a safe, high-quality, and effective suicide prevention program.

---

## MENTAL HEALTH FIRST AID - CERTIFICATION COURSE OUTLINE

---

### FOREWORD

Becoming a Mental Health First Aider in your workplace will help you identify an individual who may be experiencing a mental health crisis or problem and have the ability to initiate a conversation that may make a world of difference.

---
