0.5 DAY COURSE

5S is method of creating, maintaining and improving a clean and orderly workplace that exposes waste and errors. It helps identify unplanned levels of inventory, inadequate work processes, wasted time and equipment-related inefficiencies.

The PD Training 5S Introduction course is a great place to start on your continuous improvement initiative, because it promotes an action oriented approach to change and allows everyone in the organisation to get involved and provide input on improving their workplace.

This dynamic training course is available now throughout Australia, including Brisbane, Sydney, Melbourne, Adelaide, Canberra, and Perth.

What You'll Gain:

5S is much more than just "housekeeping". Housekeeping and an organised workplace are the results of 5S, but the real purpose of 5S is to uncover errors and problems more quickly and implement continuous improvement.

Learn to reduce waste through a systematic application of 5S principles – Sort, Set in Order, Shine, Standardise, and Sustain. This workshop teaches the basic 5S techniques and illustrates that its implementation immediately reduces waste and provides a cleaner, safer work environment.

Outcomes

After completing this course participants will be able to:

- Explain the origins of 5S methodology
- Discuss the benefits of 5S principles
- Identify opportunities for improvement using 5S principles
- Introduce and embed 5S changes to the workplace for sustained improvement
- How to design your workplace based on 5S principles

- Learn Techniques to prevent bad habits
