

# Project Task Management

1300 121 400

[REQUEST QUOTE](#)

1.5 DAY COURSE

This course is designed for new users to Microsoft Project and those who have been using only a few of its features.

Our aim is to provide you with the necessary skills to plan and control individual projects with a particular focus on creating realistic projects.

We will introduce many time-saving features using quick keys and short cuts. Project is a management tool targeted at people who need to manage the information related to their projects.

It is important that you use your new skills as soon as possible on completion of this training course. We encourage you to take your own notes and to review this Course Guide once you are back at your workplace. Use it or lose it.

## What You'll Gain:

Anyone who wants to gain more confidence in using Project. Maybe you've just started using it in your new role or perhaps you've been using it for years but aren't sure if you're doing things the 'right' way. This course will give you the foundational skills and confidence you need to start using Project effectively.

## Outcomes

This course is designed to teach you how to set up a project from the very beginning, how to schedule tasks efficiently as well as formatting a variety of views, baselining and reporting.

This hands-on course allows you to work with your own projects. You'll leave the course with:

- A soft copy of your own project plan in MS Project
- Dos and do nots for using Microsoft Project
