0.5 DAY COURSE

The new PD Training Signature series course, Time Management for Managing Projects and Complex Tasks, incorporates best practices from a range of professional frameworks like Agile SCRUM, to create a real-world time management training course for the real-world project manager.

Managing complex tasks, like projects, requires a range of time management skills. Most important is the estimation process for costs and timings. Most project estimations are difficult to forecast, hence why a large number of projects end up being delivered over-time and over-budget.

Learn essential skills like how to conduct multiple estimation techniques, delegation of tasks, meeting management, managing a crisis situation and much more! You will learn about your own personality type as well as other personality types and how to engage others in an entirely new way that provides a path to better communication and improved time management skills.

PD Training can provide a complete professional development program for your organisation which includes personality profiling and automated training needs analysis, so contact us today to learn more!

Click the "Group Booking Quote" button for a free quote for your internal team training at your preferred location or contact us to attend live courses delivered in-person or live online. Courses are available in Sydney, Melbourne, Brisbane, Perth Canberra, and Adelaide, or via virtual or hybrid training.

What You'll Gain:

The Time Management for Managing Projects and Complex Tasks course will help you learn how to manage and maximise your time in a more efficient manner. Good time management enables you to work smarter - not harder - so you can save time, effort, energy and be more productive.

This course was developed specifically for project managers, or anyone charged with managing large projects or complicated tasks, and uses the most modern tools and skills available today to assist you to become more efficient and valuable in the marketplace.
